Getting Started

- Bitcoin 0 BTC
- Ethereum 0 ETH
- Tether USD 0 USDT
- Solana 0 SOL
- USD Coin 0 USDC
- XRP 0 XRP
- Tron 0 TRX
- Cardano 0 ADA
- Cosmos 0 ATOM

Here is where you will buy your Crypto.

PLEASE ENSURE YOU CHANGE USD TO AUD!

On the right you will enter the amount you'd like to purchase and below proceed to "Buy"

The screenshot shows a crypto purchase interface. At the top, there are 'Buy' and 'Sell' buttons. Below them, the 'I have' section shows 'USD' and '\$150', both circled in red. The 'I want Bitcoin' section shows 'BTC' and '~0.0020911'. Below this are three buttons: '\$150', '\$500', and 'MAX'. At the bottom of this section is the text 'Debit Card with Ramp Network'.

Buy

A standard mobile numeric keypad with numbers 1-9, 0, a decimal point, a minus sign, a backspace key, and a checkmark key.

Verify

Let's make sure you're real by verifying your details. If you've transacted with us before, use the same email and mobile number to checkout faster.

Identity

For new customers, some identification documents may be required. The process should only take a couple of minutes and you'll need to upload a photo of either a valid drivers licence, passport or national ID.

Payment

Securely complete your payment and receive your coins within minutes.

Let's verify your details.

Here you will have to enter some personal details.

We use and recommend exodus and its partners as we trust and believe in their privacy policies, your information is safe and secure

*The estimated network fee is an approximation and the actual network fee applied on a withdrawal may differ. The actual network fee can vary due to blockchain conditions like network congestion and demand at the time of the transaction. Orders may not be canceled or reversed once submitted by you. Also, if a withdrawal request is being made, you are requesting an on-chain transaction that is not reversible or recallable. You are responsible for reviewing the recipient address and ensuring it is the correct address for the selected asset for withdrawal. Fraudulent transactions may result in the loss of your money with no recourse.

Some of the main banks don't like cypto and you'll experience issues using your card with the likes of Exodus or experience issues transferring to wallets/exchanges.

An alternative is Revolut which is a digital bank that embraces cypto, you can create an account in only minutes and receive a virtual card that can be used instantly with Apple Pay & Google Pay topups to your Revolut account from your main bank as well as regular transfer & PayID.

Two alternative banks you can also try, first being UP bank which in the past has also been more crypto friendly or WISE as well.

You can also try contacting your bank and asking them to "whitelist" your transaction under the premise you are paying to your own personal wallet, don't actually tell them what you're paying for.
